## About Indian Association of Structural Engineers (IAStructE)

Indian Association of Structural Engineers (IAStructE) is the national apex body of structural engineers in India established with the objective to cater to the overall professional needs of structural engineers. The association has become the source of expertise and information concerning all issues that involve structural engineering and public safety within the built environment. It has no commercial aim or objective.

IAStructE is purely a professional learned society with the prime objective of supporting and protecting the profession of structural engineering by upholding professional standards and acting as a mouthpiece for structural engineers.

IAStructE endeavors to ensure that its members develop the necessary skill in structural engineering and work to the highest standards by maintaining a commitment to professional ethics and standards within structural engineering.

IAStructE strives for continued technical excellence; advancing safety and innovation across the built environment. It also strives to make available to the Government, Public Sector and Private Sector - a credible source of well qualified and experienced Structural Engineers. A nationwide database of Structural Engineers has been compiled and is being constantly updated.

IAStructE undertakes a broad range of technical activities which are aimed at information sharing and capacity building. The association provides opportunity for all the members to develop various skills in structural engineering and helps members to be at the forefront of structural engineering practice. Towards achievement of its aims and objectives, IAStructE is engaged in organizing the following:

- ▶ CPD Courses for Professionals at all levels
- ▶ Refresher Courses for Fresh Graduate Engineers
- ▶ Student's orientation program
- ▶ Seminars/Workshops
- ▶ Technical Lectures by Experts
- ▶ Technical Discussions on Contentious Issues

IAStructE is currently operating from four regional / state centres. These regional centres located in the Eastern, Western, Northern and Southern parts of the country effectively cater to the professional needs of members residing/practicing all over the country.

## About Bureau of Indian Standards (BIS)

BIS is the National Standard Body of India established under the BIS Act 1986 for the harmonious development of the activities of standardization, marking and quality certification of goods and for matters connected therewith or incidental thereto.

BIS has been providing traceability and tangibility benefits to the national economy in a number of ways - providing safe reliable quality goods; minimizing health hazards to consumers; promoting exports and imports substitute; control over proliferation of varieties etc. through standardization, certification and testing.

Keeping in view, the interest of consumers as well as the industry, BIS is involved in various activities as given below:

- ▶ Standards Formulation
- ▶ Product Certification Scheme
- ▶ Compulsory Registration Scheme
- ▶ Foreign Manufacturers Certification Scheme
- ▶ Hall Marking Scheme
- ▶ Laboratory Services
- ▶ Laboratory Recognition Scheme
- ▶ Sale of Indian Standards
- ▶ Consumer Affairs Activities
- ▶ Promotional Activities
- ▶ Training Services (National & International)
- ▶ Information Services

The Standards Formulation activity is carried out through 14 Division Councils and over 650 Technical Committees functioning thereunder that have so far developed over 19000 Indian Standards.

BIS has its Headquarters at New Delhi and its 05 Regional Offices (ROs) are at Kolkata (Eastern), Chennai (Southern), Mumbai (Western), Chandigarh (Northern) and Delhi (Central). Under the Regional Offices are the Branch Offices (BOs) located at Ahmedabad, Bangalore, Bhubaneswar, Bhopal, Coimbatore, Dehradun, Faridabad, Ghaziabad, Guwahati, Hyderabad, Jaipur, Kochi, Lucknow, Nagpur, Parwanoo, Patna, Pune, Rajkot, Raipur, Durgapur, Jamshedpur and Vishakhapatnam, which offer certification services to the industry and serve as effective link between State Governments, industries, technical institutions, consumer organization etc. of the respective region.

## About the Workshop

There has been an increased awakening among professionals, owners, builders, planners and the society at large about the importance of earthquake safety of structures. At the same time, there has also been constant research & studies in the field of earthquake science and seismic engineering, necessitating updating of codes and standards from time to time.

IS 1893 (Part 1) has been recently revised, bringing into state of practice, the progress made in research, scientific and technological development globally. Similarly the IS code on ductile detailing of Reinforced Concrete Structures subjected to seismic forces, namely IS 13920 has been revised recently. Similarly IS 4326 was revised in 2013 and the National Building Code of India in 2016.

There is an often-repeated saying, "Earthquakes don't kill people, buildings do." Though as a structural engineer, one can't control the seismic hazard in the community where one lives or work, but can certainly influence the most important factor in saving lives and reducing losses from an earthquake by the adoption and enforcement of up-to-date building codes.

Adopting the latest building codes is only part of the solution. Codes must also be effectively enforced to ensure that buildings and their occupants benefit from advances in seismic provisions in the latest codes. Revision of codes also brings into focus the question of safety of old buildings. It's possible to make these buildings more resistant to earthquakes through seismic retrofitting.

IAStructE and BIS aims to bring together civil & structural consultants, architects, academicians, builders and developers, urban planners, policy makers and associated government agencies to discuss the impact of the newly released revised codes structural design of buildings. The exclusive two-day workshop will witness presentations by some of the stalwarts in the industry and the code makers themselves. This workshop will give ample opportunity to all delegates to interact directly with the experts in the domain and gain knowledge through interaction and social networking events.
