

VMS is a dynamic place for young, energetic persons with an appetite to learn and perform. The opportunities are endless. Currently we have openings for the following positions. We invite you to apply, if you share our passion for excellence. Do write to us with your detailed Curriculum Vitae along with a brief note about yourself and where you see yourself in the next ten years. Pl also share with us relevant experience certificates and recommendation letters alongwith degree certificates including marksheets.

- **Senior Structural Design Engineers with 6+ years exp.**

Candidates must possess a post-graduate degree in structural engineering must have proven competence for independent analysis and design of high-rise and large commercial RC buildings OR industrial structures at a good structural engineering firm/robust experience. He/She must have experience as a project manager on at least two projects and must possess leadership and communication skills to lead a design team.

The candidate must be an independent thinker with a flair to learn new things quickly and fully updated on latest analysis and design technologies. An MTech degree from an IIT/NIT or equiv university will be an added asset.

- **Junior Structural Design Engineers with 3+ years exp.**

Candidates must have a post-graduate degree with at least 3 years experience in analysis and design of RC/Steel buildings. They should be very thorough in analysis and design procedures on standard structural engineering software (ETABS, SAFE, RCDC, SAP, STAAD –PRO) and must have skills in validation of computer aided analysis and design. She/He must be excellent in structural engineering fundamentals and be fully familiar with relevant BIS codes.

Emoluments will be commensurate with proven capacity and are comparable to the best in the industry. Candidates may be required to undergo a competency test for both positions.
